About

Software Engineer with hands-on experience building web applications, RESTful APIs, database systems, and backend services. Strong interest in backend development and business-oriented software solutions, with experience using Go, JavaScript, and modern web technologies. Familiar with designing APIs, managing databases, implementing business logic, and integrating frontend with backend systems. A full-stack background gives me a solid understanding of end-to-end data flow, system performance, and scalable application development.

Education

Universitas Islam Riau — Bachelor of Informatics Engineering

2022 – 2026

GPA: 3.46/4.00

- Studied Web Development, Mobile Development, Backend, Database, Algorithms, Data Structures, Software Engineering, and IoT. Final Project: Developed EyeMate, an AI-based mobile application using YOLOv8 for object detection and VQA to assist people with visual impairments in recognizing objects and reading text through voice and text guidance.

SMK Taruna Pekanbaru — Computer and Network Engineering

2019 – 2022

average

- Studied computer systems, networking, Linux, Microsoft Office, IP configuration, network administration, and website development using WordPress.
-

Work Experience

Backend Developer — SIOPLAS, SKIPM Pekanbaru Project

08 October 2025 – 17 January 2026 | Pekanbaru, Indonesia

- Developed the backend of the SIOPLAS application using Go (Golang) to support data management, task management, and operational reporting.
- Designed and developed RESTful APIs to enable communication between the backend and frontend applications.
- Designed and managed MySQL databases, including table structures, data relationships, and CRUD operations based on system requirements.
- Implemented business logic, data validation, request handling, and response management within the backend services.
- Developed task and reporting features to support administrative processes and work monitoring.
- Integrated AI functionality to summarize reports, making information more concise and efficient to review.

UI/UX Design Intern — PT Pertamina Refinery Unit II Dumai

01 July 2025 – 29 August 2025 | Dumai, Indonesia

- Designed UI/UX prototypes using Figma for a chatbot-based website aimed at facilitating field report submissions to the relevant departments responsible for equipment and resource requests.
- Assisted with employee data entry and administrative data management.
- Conducted direct field observations of the oil processing and management operations.
- Assisted the CCTV division in monitoring employee activities and work operations at PT Pertamina Refinery Unit II Dumai.

Projects

EyeMate — AI-Powered Mobile Application

- Designed and developed an AI-powered mobile application using YOLOv8 for real-time object detection and Visual Question Answering (VQA) to assist people with visual impairments in recognizing objects and reading text through voice and text guidance.

SIOPLAS — Web-Based Task & Reporting Management System

- Developed a web-based system for managing task assignments and quarterly reports between supervisors and staff, with an AI-powered report summarization feature to generate concise report summaries.
- Developed the backend using Go (Golang) and MySQL, including RESTful API development and database management.

Student Attendance Management System

- Developed a web/mobile-based attendance management system that allows students to record attendance for each course, manage attendance data, and monitor attendance history efficiently.

Medication Reminder Mobile Application

- Developed a mobile application to help users manage medication schedules through regular medication reminders and routine tracking.

Skill

Technical Skill :

- **Backend/API:** RESTful API, API Integration, Postman, Server
- **Frontend Web:** Vue.js, React.js, JavaScript, HTML, CSS, Java.js
- **Database:** MySQL, SQLite, MongoDB, Go (Golang), Node.js, Express.js
- **Mobile Development:** Flutter
- **Lainnya:** Business Logic, Role-Based Access, State Management, End-to-End Application Development

Soft Skill

Team Collaboration · Communication · Problem Solving · Adaptability · Time Management · Responsibility · Continuous Learning
